

PROJECT REFERENCE

PRODUCT CATEGORY	OIL SPILL EQUIPMENT
PRODUCT NAME	Air Boom
APPLICATION	Petroleum Depot (replacement)
SPECIFICATION	75m Length

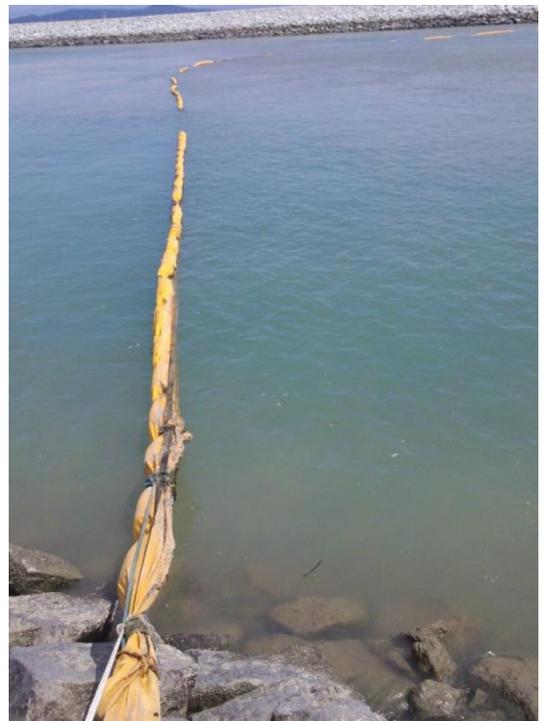

LOCATION: SANDAKAN, SABAH

FUNCTION: Oil Spill Response Boom (replacement boom)

To ensure the boom purchased is fully functional at all time, all boom have to be periodically deployed and inspected for damages and cleaned after each deployments. ENVIROZONE recommend all boom to be deployed at least once a year and inspected at least every 6 month. This will ensure the functionality of the booms are safeguard against spills that will happen when they are not expected.

Wrong anchoring of boom without protection of boom increase chances of damages and premature wear and tear during deployment

OLD BOOM, purchased 12 years ago

- *Sunken segment no longer capable to contain oil spill*
- *Faded Colour denoted UV damages to the boom fabric*

International Safety Orange (Outrageous Orange) is our primary Buoyant Floatation colour. This particular shade is renowned for its ability to remain colourfast.

UV and Colourfast stabilizers added to ensure a long lifespan

Professional training provided to ensure proper operation and maintenance of the booms
